

Berries.—The impression is past, but the crop will not reach its peak until the end of March. The receipts at New Orleans are now about 1,000,000 lbs., while the exports to Mobile and New Orleans together, as far as we can learn, are not much less than 1,000,000 lbs. The market value of the crops is \$100,000 per ton.

Cotton.—There is an extra supply of this article in market, and it is selling at \$1.00 per lb., by candle.

Flour.—The market is good, State flour at \$1.00 per lb., and Western at 90¢ per lb.

Meat.—The market is good, State meat at \$1.00 per lb., and Western at 90¢ per lb.

Pork.—Corned, \$1.00 per lb.; bacon, \$1.00 per lb.; ham, \$1.00 per lb.

Calves.—Gathered, \$1.00 per lb.; alive, \$1.00 per lb.

Markets. CAREFULLY REPORTED FOR THE TRIBUNE.

WEDNESDAY, Feb. 19, 1857.

ASHES.—The market is better for Potts, the demand is fair, sales at \$7.50 per ton; Pease and salt, \$7.25 per ton.

BRICKS AND SHOES.—The resumption of communication with the Eastern States has enabled dealers to get forward their stocks with more freedom, and the assurances now ready for the importation of iron and steel, have given a decided impetus to all articles. All particular exertion is being made in their movements, purchasers being unwilling to accede to the high rates so universally demanded. Prices rule in favor of the seller, and the tendency is still upward. There is scarcely any thing doing for shipping.

BLUES-ANAL.—Yellow is quiet; we quote at 20¢ per lb.

BRICKS AND TILES.—No change has occurred in prices. Mail still sells at 25¢ per lb. English Virginian Pipe sell at 25¢ per lb.

COAL.—The market has been very animated, chiefly of imports; the sales reach 7,000 tons at the present time.

COTTON.—The market is good, and the demand is equal to the supply for the remainder of the season. The grade has rapidly advanced, being abundant and comparatively neglected, they have not partaken in the improvement, and are still low.

France.—The Continent of Europe and our own spinners have already secured a much larger share in proportion than Great Britain, of the Cotton market.

French.—The market is good, and the demand is equal to the supply for the remainder of the season.

Gum.—The market is good, and the demand is equal to the supply for the remainder of the season.

Hemp.—The market is good, and the demand is equal to the supply for the remainder of the season.

Iron.—The market is good, and the demand is equal to the supply for the remainder of the season.

Lead.—The market is good, and the demand is equal to the supply for the remainder of the season.

Linen.—The market is good, and the demand is equal to the supply for the remainder of the season.

Milk.—The market is good, and the demand is equal to the supply for the remainder of the season.

Oil.—The market is good, and the demand is equal to the supply for the remainder of the season.

Paint.—The market is good, and the demand is equal to the supply for the remainder of the season.

Pearl.—The market is good, and the demand is equal to the supply for the remainder of the season.

Pease.—The market is good, and the demand is equal to the supply for the remainder of the season.

Plaster.—The market is good, and the demand is equal to the supply for the remainder of the season.

Rubber.—The market is good, and the demand is equal to the supply for the remainder of the season.

Sugar.—The market is good, and the demand is equal to the supply for the remainder of the season.

Tin.—The market is good, and the demand is equal to the supply for the remainder of the season.

Wool.—The market is good, and the demand is equal to the supply for the remainder of the season.

Wood.—The market is good, and the demand is equal to the supply for the remainder of the season.

Yarn.—The market is good, and the demand is equal to the supply for the remainder of the season.

Zinc.—The market is good, and the demand is equal to the supply for the remainder of the season.

Leather.—The market is without change.

Oil.—The market is good, and the demand is equal to the supply for the remainder of the season.

Paint.—The market is good, and the demand is equal to the supply for the remainder of the season.

Plaster.—The market is good, and the demand is equal to the supply for the remainder of the season.

Rubber.—The market is good, and the demand is equal to the supply for the remainder of the season.

Sugar.—The market is good, and the demand is equal to the supply for the remainder of the season.

Tin.—The market is good, and the demand is equal to the supply for the remainder of the season.

Wood.—The market is good, and the demand is equal to the supply for the remainder of the season.

Yarn.—The market is good, and the demand is equal to the supply for the remainder of the season.

Zinc.—The market is good, and the demand is equal to the supply for the remainder of the season.

Leather.—The market is without change.

Oil.—The market is good, and the demand is equal to the supply for the remainder of the season.

Paint.—The market is good, and the demand is equal to the supply for the remainder of the season.

Plaster.—The market is good, and the demand is equal to the supply for the remainder of the season.

Rubber.—The market is good, and the demand is equal to the supply for the remainder of the season.

Sugar.—The market is good, and the demand is equal to the supply for the remainder of the season.

Tin.—The market is good, and the demand is equal to the supply for the remainder of the season.

Wood.—The market is good, and the demand is equal to the supply for the remainder of the season.

Yarn.—The market is good, and the demand is equal to the supply for the remainder of the season.

Zinc.—The market is good, and the demand is equal to the supply for the remainder of the season.

Leather.—The market is without change.

Oil.—The market is good, and the demand is equal to the supply for the remainder of the season.

Paint.—The market is good, and the demand is equal to the supply for the remainder of the season.

Plaster.—The market is good, and the demand is equal to the supply for the remainder of the season.

Rubber.—The market is good, and the demand is equal to the supply for the remainder of the season.

Sugar.—The market is good, and the demand is equal to the supply for the remainder of the season.

Tin.—The market is good, and the demand is equal to the supply for the remainder of the season.

Wood.—The market is good, and the demand is equal to the supply for the remainder of the season.

Yarn.—The market is good, and the demand is equal to the supply for the remainder of the season.

Zinc.—The market is good, and the demand is equal to the supply for the remainder of the season.

Leather.—The market is without change.

Oil.—The market is good, and the demand is equal to the supply for the remainder of the season.

Paint.—The market is good, and the demand is equal to the supply for the remainder of the season.

Plaster.—The market is good, and the demand is equal to the supply for the remainder of the season.

Rubber.—The market is good, and the demand is equal to the supply for the remainder of the season.

Sugar.—The market is good, and the demand is equal to the supply for the remainder of the season.

Tin.—The market is good, and the demand is equal to the supply for the remainder of the season.

Wood.—The market is good, and the demand is equal to the supply for the remainder of the season.

Yarn.—The market is good, and the demand is equal to the supply for the remainder of the season.

Zinc.—The market is good, and the demand is equal to the supply for the remainder of the season.

Leather.—The market is without change.

Oil.—The market is good, and the demand is equal to the supply for the remainder of the season.

Paint.—The market is good, and the demand is equal to the supply for the remainder of the season.

Plaster.—The market is good, and the demand is equal to the supply for the remainder of the season.

Rubber.—The market is good, and the demand is equal to the supply for the remainder of the season.

Sugar.—The market is good, and the demand is equal to the supply for the remainder of the season.

Tin.—The market is good, and the demand is equal to the supply for the remainder of the season.

Wood.—The market is good, and the demand is equal to the supply for the remainder of the season.

Yarn.—The market is good, and the demand is equal to the supply for the remainder of the season.

Zinc.—The market is good, and the demand is equal to the supply for the remainder of the season.

Leather.—The market is without change.

Oil.—The market is good, and the demand is equal to the supply for the remainder of the season.

Paint.—The market is good, and the demand is equal to the supply for the remainder of the season.

Plaster.—The market is good, and the demand is equal to the supply for the remainder of the season.

Rubber.—The market is good, and the demand is equal to the supply for the remainder of the season.

Sugar.—The market is good, and the demand is equal to the supply for the remainder of the season.

Tin.—The market is good, and the demand is equal to the supply for the remainder of the season.

Wood.—The market is good, and the demand is equal to the supply for the remainder of the season.

Yarn.—The market is good, and the demand is equal to the supply for the remainder of the season.

Zinc.—The market is good, and the demand is equal to the supply for the remainder of the season.

Leather.—The market is without change.

Oil.—The market is good, and the demand is equal to the supply for the remainder of the season.

Paint.—The market is good, and the demand is equal to the supply for the remainder of the season.
